New Operation of Store, Rate Hike Discussed by CB

By GENELL JACKSON

Morris McCollum, manager of the student book store, appeared before Central Board last night, and for nearly two hours, answered questions concerning operation under the new system which is to go into effect this month.

Final steps for de-incorporation for the student store are expected to be taken within a week, and then the store will be under administrative control.

The present board of directors will be replaced by a student-faculty committee with the administration appointing the faculty members and Central Board selecting five students.

Legally, all decisions will rest with the administration. However, McCollum pointed out students could expect to voice opinions and figure in any decisions made.

First Obligation

"In years past, whether students liked it or not, my obligations were first to Main Hall and then to the student board," McCollum said. He pointed out the students have been the legal board of directors, and any profit realized from store operation has been returned to ASMSU for allocation.

Under the new system, profit gained in the next 15 years will be used to pay for the new build-

ing. After that the administration will decide how surplus will be used.

McCollum showed the group floor plans of the new store, which will be located on the second floor of the Lodge addition now under construction.

The latter half of the meeting was devoted to discussion of the manner in which room and board rates were raised this quarter.

Rates were raised 10 per cent, and a letter to that effect was sent to all dormitory residents Dec. 6. However, 288 students had already made a down payment on room and board after receiving bills quoting the former rates.

These students believed the new rates should not apply to them, because in a sense they had entered into a contract with the University.

Three Possibilities

One of the Central Board members had discussed the matter with a lawyer, and three possibilities were outlined.

The students could meet with Pres. Carl McFarland to air their complaints, they could have an open hearing with a lawyer drawing up and presenting a brief or an individual could file suit against the University.

Andy Cogswell pointed out the University reserved the right to raise rates at any time, and this was quite necessary in the face of higher operating costs. He further believed the students had no case to take to court, admitting the raise notices should have been sent sooner.

"We waited as long as possible, hoping to raise the rates less than 10 per cent," he said.

Central Board went on record recommending notices be sent sooner in the future, emphasizing they had no objection to the raise itself, only to the manner in which it was presented.

Boosters Cancel Trip From Butte

Butte Area Booster Night has been cancelled, according to Ross Miller, director of the public service division.

Miller said that he had been advised by Duncan Campbell, who is in charge of Butte Area night, that the train scheduled to leave Butte Saturday was cancelled because only 200 tickets had been purchased. A minimum of 340 was needed.

In addition to the cancelling of the train from Butte, a special bus from Bozeman, sponsored by MSC for students, was cancelled because of lack of interest.

Mad Bomber In Hospital After Arrest

NEW YORK (AP)—The mad bomber is undergoing psychological tests at a hospital in New York City following his arraignment yesterday.

George Metesky was arrested at his home in Waterbury, Conn. yesterday, handcuffed and taken to New York, and interviewed by scores of newsmen.

Metesky admitted he had planted the bombs all around New York City for 16 years to get even with the Consolidated Edison Company of New York. He was employed by the utility company when he suffered an injury 25 years ago.

Metesky was caught because of the similarity of his writing in company files and a letter he sent to a New York newspaper.

He said he learned to make the bombs, which have injured at least 15 persons, by taking correspondence courses in electronics.

Snow Hits Campus in Time For AWS Winter Weekend

With the new supply of snow, living groups are busy planning and working on their snow sculptures for the Winter Weekend this Friday and Saturday.

Disneyland is the theme of this year's weekend, sponsored by the Associated Women Students. Besides the sculptures, there will be the coronation of a Snow King and Queen Friday night, two dances and a coffee hour.

Sculptures must be completed by 4 p.m. Saturday. A coffee hour will start at this time in the Grill Room during which the winners will be announced.

Three judges will select the sculpture winners. The statues may not be colored, but props, music and signs may be used.

Groups Matched

Living groups working with each other are Turner Hall and Sigma Chi; Brantly and Sigma Phi Epsilon; Corbin, North-Corbin and Jumbo, Elrod; Kappa Alpha Theta and Craig, Omega Epsilon; Delta Gamma and Phi Delta Theta.

Others are Sigma Kappa and Sigma Alpha Epsilon; Kappa Kappa Gamma and Alpha Tau Omega; Delta Delta Delta and Sigma Nu; Alpha Phi and Phi Sigma Kappa; and Synadelphic and Theta Chi.

Sentinel Pictures Taken In Activity Room Tonight

Sentinel pictures will be taken of the following groups in the activity room of the lodge tonight:

- 6:45—SCA
- 7:00—Psi Chi
- 7:10—Aquamaids
- 7:20—Tau Kappa Alpha
- 7:40—Sigma Delta Chi
- 7:50—Beta Gamma Epsilon
- 8:00—WRA
- 8:10—Home Arts Club
- 8:40—Phi Sigma Kappa
- 9:15—Kams and Dregs

More Snow, Cold Forecast Today

More snow and cold is forecast for Missoula tonight and tomorrow. A cold front is moving in from northern Montana and the winds will become more northerly before tomorrow morning.

At eight o'clock this morning the temperature was 10 above and it is expected to rise to 15 above this afternoon.

Tonight's low will be around five below zero. At present there is nine inches of snow on the ground in Missoula.

THREE GRADS WIN WINGS

Second Lts. John L. Dean, Roger G. Hayes, and Harold B. Ferguson, all of Missoula, were recently awarded silver pilot wings in graduation ceremonies at Texas Air bases. All three received their commissions through the Air Force ROTC program at MSU.

Tornadoes Strike, Killing 12 Persons

CHICAGO (AP)—Tornadoes, flash floods and more bitter cold have combined to produce a bleak weather outlook for the nation.

The clash of bitter cold arctic air with milder air triggered tornadoes in Oklahoma, Louisiana, Kentucky and Missouri yesterday, killing at least 12 persons.

Clayburn Garrett, World War II veteran, said in Gans, Okla., that it looked just like Germany after the bombs hit. "There just wasn't anything left of some of the houses but splinters."

More tornado warnings have been issued for parts of the South and Southwest.

Heavy rains melted snows in the Northeast, posing flood threats in western New York and Pennsylvania.

And, the weather bureau has issued zero cold wave warnings for the area from Kansas to northern Illinois. Parts of Kansas already are blanketed by up to four inches of snow.

Publicity Committee meeting 8 tonight in Lodge Activities Room.

Meet the Cast

ARLENE JENNINGS

Arlene Jennings will play a leading role opposite Bruce Cusker in "The Importance of Being Earnest."

Arlene will portray Cecily Cardew, and Algernon Moncrieff's "Own, dear, sweet, loving, little darling." She goes for long walks, pays no attention at all to her lessons and is mad, mad, mad for romance! It is Cecily's dream to love someone by the name of Ernest. For as Cecily herself puts it, "There is something in that name that seems to inspire absolute confidence."

Arlene played the part of Miss M. Muse in the Masquers fall production of "Skin of Our Teeth." She also played "Electra" in the student reading of the production of the same name.

Last summer, Arlene worked with the "Seely Lake Players."

BRUCE CUSKER

Bruce Cusker will be playing one of the leading roles in The Masquers forthcoming production, "The Importance of Being Earnest," Jan. 29 through Feb. 2.

In ". . . Earnest" Bruce plays the part of Algernon Moncrieff. Concerning his part, Bruce said, "I think the play is perfectly charming, ridiculously amusing, and absolutely impossible. As for Algernon, I would say that he is terribly conceited, has nothing, but looks everything."

Bruce is not new to University theater goers. He played the part of Barbntio in "Othello" and Fergus O'Donnall in "The Seraph Interceded." He has also worked back stage for "Skin of Our Teeth" and "Blithe Spirit."

Bruce was awarded the Drama Merit Award for 1956.

Editorially . . .

It's the Sting of Truth that Pains

"It is through criticism . . . that the race has managed to come out of the woods and lead a civilized life. The first man who objected to the general nakedness and advised his fellows to put on clothes was the first critic."—E. L. Godkin.

Sainte-Beuve said it this way: "The critic is only the secretary of the public, but a secretary that does not wait to take dictation . . . instead one who expresses every morning what everybody else is thinking."

If you want it in even simpler English, Benjamin Franklin offered: "The sting of a reproach is the Truth of it."

You may recall the Kaimin criticized the University Chamber Band for choice of inappropriate "fight" music at Grizzly basketball games. The student journalists were set upon by irate musicians from every corner of campus for what they considered the utter audacity to criticize a student group—especially when that group felt it was putting forth improved efforts. To quote from one letter:

"I am more than disgusted that any one student on campus would have the temerity—the presumptuousness—to pass judgment on a group such as the Chamber Band and its director."

This brings us to the question what is the function of a newspaper and does this paper have the right to criticize its peers. We believe

it does. In fact, we believe this is the most important function of a responsible editorial page.

When a paper becomes a sounding board that does nothing but pat various organizations on the back, then it ceases to fill its obligation as a newspaper. We believe in giving credit where credit is due, but we also feel we must offer constructive criticism when it is due.

If musicians will re-read the Chamber Band editorial, they will note that the abilities, graciousness and perfection of the group were in NO way criticised. It was instead, selection of inappropriate music that was discussed. Had the band, instead of sulking like a little child whose wrists had been slapped, analyzed this criticism and acted accordingly, they would have risen to the situation and gained not only the respect of the Kaimin, but of the other students as well.

Name, if you can, organizations that are criticized more than The Kaimin, the administration, the Lodge, or the athletes. We do not cease to publish because others "have the temerity . . . to pass judgment" on us. Instead, we welcome criticism and strive to better ourselves from it. The same is true of the administration, the Lodge, the athletes and other organizations that are constantly "under fire."

We can only hold pity for an individual or group that cannot accept criticism and profit from it!

—Genell Jackson, Associate Editor

Theatre Tryouts Scheduled Today

Tryouts for four one-act plays will be conducted today in Simpkins Theater from 1 to 4 p.m. in the afternoon and 7 to 10 p.m. in the evening.

Tryouts are open to all students, Bo Brown, drama director, said. The plays will be given in a free public performance Feb. 21-23 in Simpkins Theater.

Sigma Phi Epsilon Took Six New Pledges Monday

Sigma Phi Epsilon took advantage of the two week silence period imposed on the four larger houses by Interfraternity Council and picked up six more pledges Monday night.

The new Sig Ep pledges are Vernon Halcro, Power; Gene Eisenman, Kalispell; Larry Wilson, Lakeside; Doug Kemmerer, Missoula; Larry Allen, Drummond; and Don Rickgauer, Clinton, Ill.

Enjoy the difference! More people smoke Camels, year after year, than any other cigarette of any kind. Try Camels — they've really got it!

Wyoming to Play 10 Game Schedule

The University of Wyoming will play a 10 game football schedule this year against seven Skyline conference opponents and three intersectional teams—the Air Force Academy, Kansas State, and Oklahoma A&M.

The schedule includes five home games and the annual Montana-Wyoming game at Billings. The game is scheduled to provide a so-called home contest for Montanans and residents of northern Wyoming.

The season opens Sept. 21 against Kansas State in Laramie and closes against Denver University on Thanksgiving Day in Denver.

RIDING CLASS SCHEDULED FOR TUESDAYS, FRIDAYS

A new adult riding class will be conducted on Tuesdays and Fridays at the University Stables starting this week, according to Lewis Cloninger, manager.

For particulars those interested may see Mr. or Mrs. Cloninger or Lawrence Houck at the stables.

Brott High In Scoring; Waters Fourth

SALT LAKE CITY (AP)—Denver center Dick Brott, who is threatening scoring records held by former Pioneer stars Dale Toft, Jack Hauser and Vince Boryla, currently leads the Skyline Conference in both rebounds and total points.

Montana guard Clancy Waters jumped to fourth in the scoring race with a total of 82 points.

Brott tallied 55 points in two games over the weekend to move ahead of Utah State's Ted Smith. Smith dropped to second in scoring statistics compiled by the commissioner's office.

The 55-point output raised Brott's total in five games to 108 points, an average of 21.6. Brott has 95 rebounds to lead the conference in that department.

Smith, who held the scoring lead last week, follows Brott with an even 100 points. Brigham Young's Tom Steinke has the second best average with 84 points in 4 games for an even 21 points per game.

Utah State's Joe Lockyer moved into second spot in rebounding with 67. New Mexico's Rusty Goodwin, who led in rebounds last week, dropped to third with 62.

SKI STUDENTS REMINDED OF BUS SCHEDULE

The physical education ski classes were reminded yesterday by instructor Mavis Lorenz that the buses leave from the Men's gym Fridays. Students must have their skis and poles fastened together in some manner and loaded on the bus by 1 p.m. The buses will leave the parking area promptly at 1:10 p.m. regardless of late comers, she said.

Brigham Young, Skyline leader, is rated 15th in the nation in this week's United Press poll.

COMES INTO HIS OWN—Russ Sheriff, Grizzly center, will be a vital key against the MSC Bobcats in the Field House Saturday night.

'Tips Prepare For MSC Invasion Sat.

Despite no conference activity this weekend the Montana Grizzlies are working overtime in preparation for Saturday's contest with Montana State.

Montana State has the nucleus for a fine team, and several times during the season the 'Cats have shown their ability. In late December MSC captured fifth place in the All-American tournament at Owensboro, Ky.

The two teams will meet only once in Missoula this year and then once in Bozeman instead of playing a four game series as in previous years. MSU travels to Bozeman Feb. 26.

ATO, Shot Rods, Jumbo, Gunners Get I-M Wins

Four relatively low-scoring games were featured in Monday night's play in intramural basketball.

Alpha Tau Omega gained their first win at the expense of Phi Sigma Kappa 47-31 in the "B" league. The ATO's now have a 1-1 record, while the Phi Sigs have dropped two contests. Woosted hit 14 points for ATO to take game scoring honors, while R. Brockway lead his team with 12.

Jumbo Hall edged out Pharmacy 31-28 on the strength of 10 points made by Weishaar. Jumbo led most of the game, and withstood a fourth quarter challenge by Pharmacy to gain the "B" league win. Raunig led Pharmacy with 9 points.

A close contest of the day saw the Shot Rods squeak by the Tomahawks 41-39 in "E" league play. The lead changed hands often in the first half, but the Shot Rods held the edge at the half, 25-21. Mendel bucketed 18

Staff Members Go to Meetings; One is Honored

Edward B. Dugan, professor of journalism, will represent the Kaimin at the annual mid-winter meeting of publication managers from Northwest, West Coast colleges in Portland today through Friday.

Other schools represented include Washington, Washington State, Oregon, Oregon State, Idaho, California, UCLA and USC.

Carleton Gives Address

Linus J. Carleton, dean of the School of Education, will address Montana elementary school principals at their annual winter conference in Great Falls today. His subject will be "The Principal's Role in Instructional Leadership."

Richard L. Darling, assistant professor of education, will assist the Lake County Student Library Club at an organizational meeting in Ronan, Tuesday.

Darling will speak to the student librarians on the advantages of organizing a group similar to other clubs throughout the country.

Diettert Attends

Dr. R. A. Diettert, botany professor and director of the Montana Science Fair, is attending the annual meeting of the Montana High School Assn. in Great Falls.

Dr. Diettert will report to the Association on the 1956 Montana Science Fair and on the present status of the Science Fair program in the state. The meeting began Monday and will close today.

Dr. Oscar J. Hammen, chairman of the history and political science department, has been elected to the national council of Phi Alpha Theta, history honorary society. He will also serve on the national council from the mountain and northwest states for two years.

Field House Halts Game Time ID's

The Field House ticket office announced Monday that it does not intend to continue issuing student activity cards at game time.

Students who are new this quarter may get their activity cards at Main Hall, according to ticket office clerk Mrs. Audrey Kershner. This also goes, she said, for previously registered students who say that they were unable to get their activity cards.

A check by the ticket office has revealed that Main Hall has many student activity cards that have not been called for.

SPA to Get Many From Out-of-State

Enrollment for the 12th annual School of Public Administration shows representation from two state agencies and four federal conservation agencies, according to Ross Miller, director of the MSU Public Service Division.

The school will be in session on campus Feb. 4 to March 1. It is sponsored jointly by the U. S. Forest Service and the MSU School of Forestry, for natural resources management personnel.

The Montana Fish and Game Dept. and the State Forestry Dept. will have members attending the sessions, as will the Nevada Fish and Game Commission, and two colleges.

The U. S. Forest Service will have the largest representation with personnel expected to come from California, Idaho, South Dakota, North Dakota, Wyoming, Oregon, and Montana. The Soil Conservation Service expects representatives from Montana, Oregon, and North and South Dakota.

National Park Service personnel from New Mexico and California and Bureau of Indian Affairs delegates from Idaho and North Dakota have registered. One private citizen also has registered.

Malouf Gives Talk On Early Montana

Carling Malouf, assistant professor of anthropology, spoke to the Liberal Arts Club last night on pre-historic Montana.

Malouf said that studies show there were few, if any, pre-historic Indians living on the west side of the continental divide in Montana 4,000 to 6,000 years ago. At that time the five Missoula valleys were a part of the glacial Lake Missoula. When the lake receded Indians moved into the valleys.

It wasn't until after the 16th century, Malouf said, that the modern Indian came to western Montana. It is believed that this migration was part of a national migration west by the Indian as a result of the settlers forcing eastern coastal Indians inland.

Malouf showed films of summer field trips from which he gathered much of his information.

4 Miles East of Missoula

First of all, what's it all about? What does a fellow like John Jackson do all day? In his own words, "I keep in touch with the executives of many different companies—advising them on the use of their IBM electronic data processing computers. I personally consult with these customers, and analyze their scientific and technical problems for solution by IBM. Occasionally, I'm asked to write papers, and give talks and demonstrations on electronic computing. All in all, it's pretty fascinating . . . something new pops up every day." In other words, John is a full-fledged computing expert, a consultant . . . and a very important person in this

Calling on a customer

coming age of automation through electronics.

Since the IBM laboratories are always devising easier and faster ways to solve the problems of science, government, and industry, an Applied Science Representative can never say he's learned his job and that's the end of it. At least once every two months, he attends seminars to be updated on the latest developments in engineering and operations research.

Introduces new methods

During the two years that John has spent with IBM in Applied Science, he has guided innumerable IBM customers to new and better ways of doing things electronically. For example: about a year ago, a leading aircraft manufacturer wanted to experiment with a radically different design for a nuclear reactor. Although the basic format had been established, the project still required many months of toil with mathematical equations.

What a MATHEMATICIAN can do at IBM

Mathematics is an ancient but ever-advancing science that contains many forms. It shouldn't surprise you then that it took some time before John Jackson discovered the one brand of mathematics that seemed custom-tailored to his ability and temperament. John is an Applied Science Representative, working out of the IBM office at 122 East 42nd Street, N. Y. C.

The aircraft people decided that they couldn't afford to wait that long, so they called in IBM. After discussion with top executives, John helped to map out a computer program that saved the organization over 100 days

Mapping out a computer program

of pencil-chewing, nail-biting arithmetic. Later, for this same company, John organized the establishment of computer systems for aircraft performance predictions . . . for data reduction of wind tunnel tests . . . and for wing stress analysis. At the same time, he worked with this company's own employees, training them in the use of IBM equipment. John still drops around to see that everything is running smoothly.

Another service that John performs is the constant reappraisal of each customer's IBM operation. Occasionally, a customer may tie himself in knots over a procedural "stickler." Periodically, in fact, John brings IBM customers together . . . just to talk over what's happening in each other's business—how everybody else handled that old bugaboo in any industry . . . details.

New field for Mathematicians

John is exercising his mathematical know-how in a field that was practically unheard of ten years ago. Even now, this kind of work may be news to you. It was to John Jackson a few years back when he was an undergraduate at the University of Colorado. At that time, he was considering actuarial work or mathematical research. But John liked the excitement and diversification of science and industry and he wanted to use his

Dr. Tascher Active In Annual Meeting

Dr. Harold Tascher, sociology professor, will attend the fifth annual program meeting of the Council on Social Work Education today through Saturday in Los Angeles, Calif.

Dr. Tascher will serve as chairman of three sections of the program: a workshop concerning The Contribution of Undergraduate Education to Social Work Education; a session on undergraduate education, which is part of Curriculum Study Project; and the business meeting of the Undergraduate Division.

He will serve as co-chairman of

Students Present Recital; Trumpet Duet Featured

Seven music students presented a recital Monday afternoon in the music auditorium.

They were: George Shirley, Fort Benton, Organ; Marie Vance, Fairfield, piano; Robert Thornton, Missoula, and Ephraim Hackett, Stevensville, trumpet duet; John Varnum, Harlem, piano; Rulee Matsuoka, Chinook, piano and Linda Copley, Conrad, piano.

Music selections were by Dunsstable, Bach, Chopin, Vivaldi, Delmas, Liszt, and Schubert.

the joint meeting of the Division of Graduate Schools and the Undergraduate Departments.

mathematical background in both of those areas. It was not until he was interviewed by IBM that field computing whetted his scientific appetite. A few months later, John launched his own IBM career as an Applied Science trainee.

Promotionwise, John has come a long way since that time. He's now an Applied Science Representative in one of the busiest, most responsible offices in the IBM organization . . . mid-town Manhattan.

With his wife, Katherine, and daughter, Lisa, 20 months, and John,

Discussing a problem with colleagues

Jr., 6 weeks, he enjoys his suburban Port Washington home. He's happy and he's satisfied. And then, too, John knows a few vital statistics about IBM . . . such as the fact that the Applied Science Division has quadrupled during the past three years, and that in 1956 alone, over 70 promotions were conferred. If ever a future held promise, here is one.

IBM hopes that this message will help to give you some idea of what a mathematician can do at IBM. There are equal opportunities for E.E.'s, M.E.'s, physicists and Liberal Arts majors in IBM's many divisions—Research, Product Development, Manufacturing Engineering, Sales and Technical Services. Why not drop in and discuss IBM with your Placement Director? He can supply our latest brochure and tell you when IBM will next interview on your campus. Meanwhile, IBM will be happy to answer your questions. Just write to Mr. P. H. Bradley, IBM, Room 0000, 590 Madison Avenue, New York 22, N. Y. Dept. 8701
